

# **Excretion**

This is the process by which organs get rid of metabolic waste, produced by the body

## Excretory organs

```
graph LR; A[Excretory organs] --- B[Lungs- excrete carbon dioxide made from respiration]; A --- C[Skin – excretes urea, salt and water in sweat]; A --- D[Kidneys- excretes urine]; A --- E[Liver: forms urea which is excreted in urine];
```

Lungs- excrete carbon dioxide made from respiration

Skin – excretes urea, salt and water in sweat

Kidneys- excretes urine

Liver: forms urea which is excreted in urine
