SPACE SUIT

Here are some interesting facts about space suits that can be read out loud to your child.

After, he can color a space suit and helmet of his own!

Astronauts have worn all sorts of suits over the years for traveling to, and working and living in, space.

Why do they wear suits?

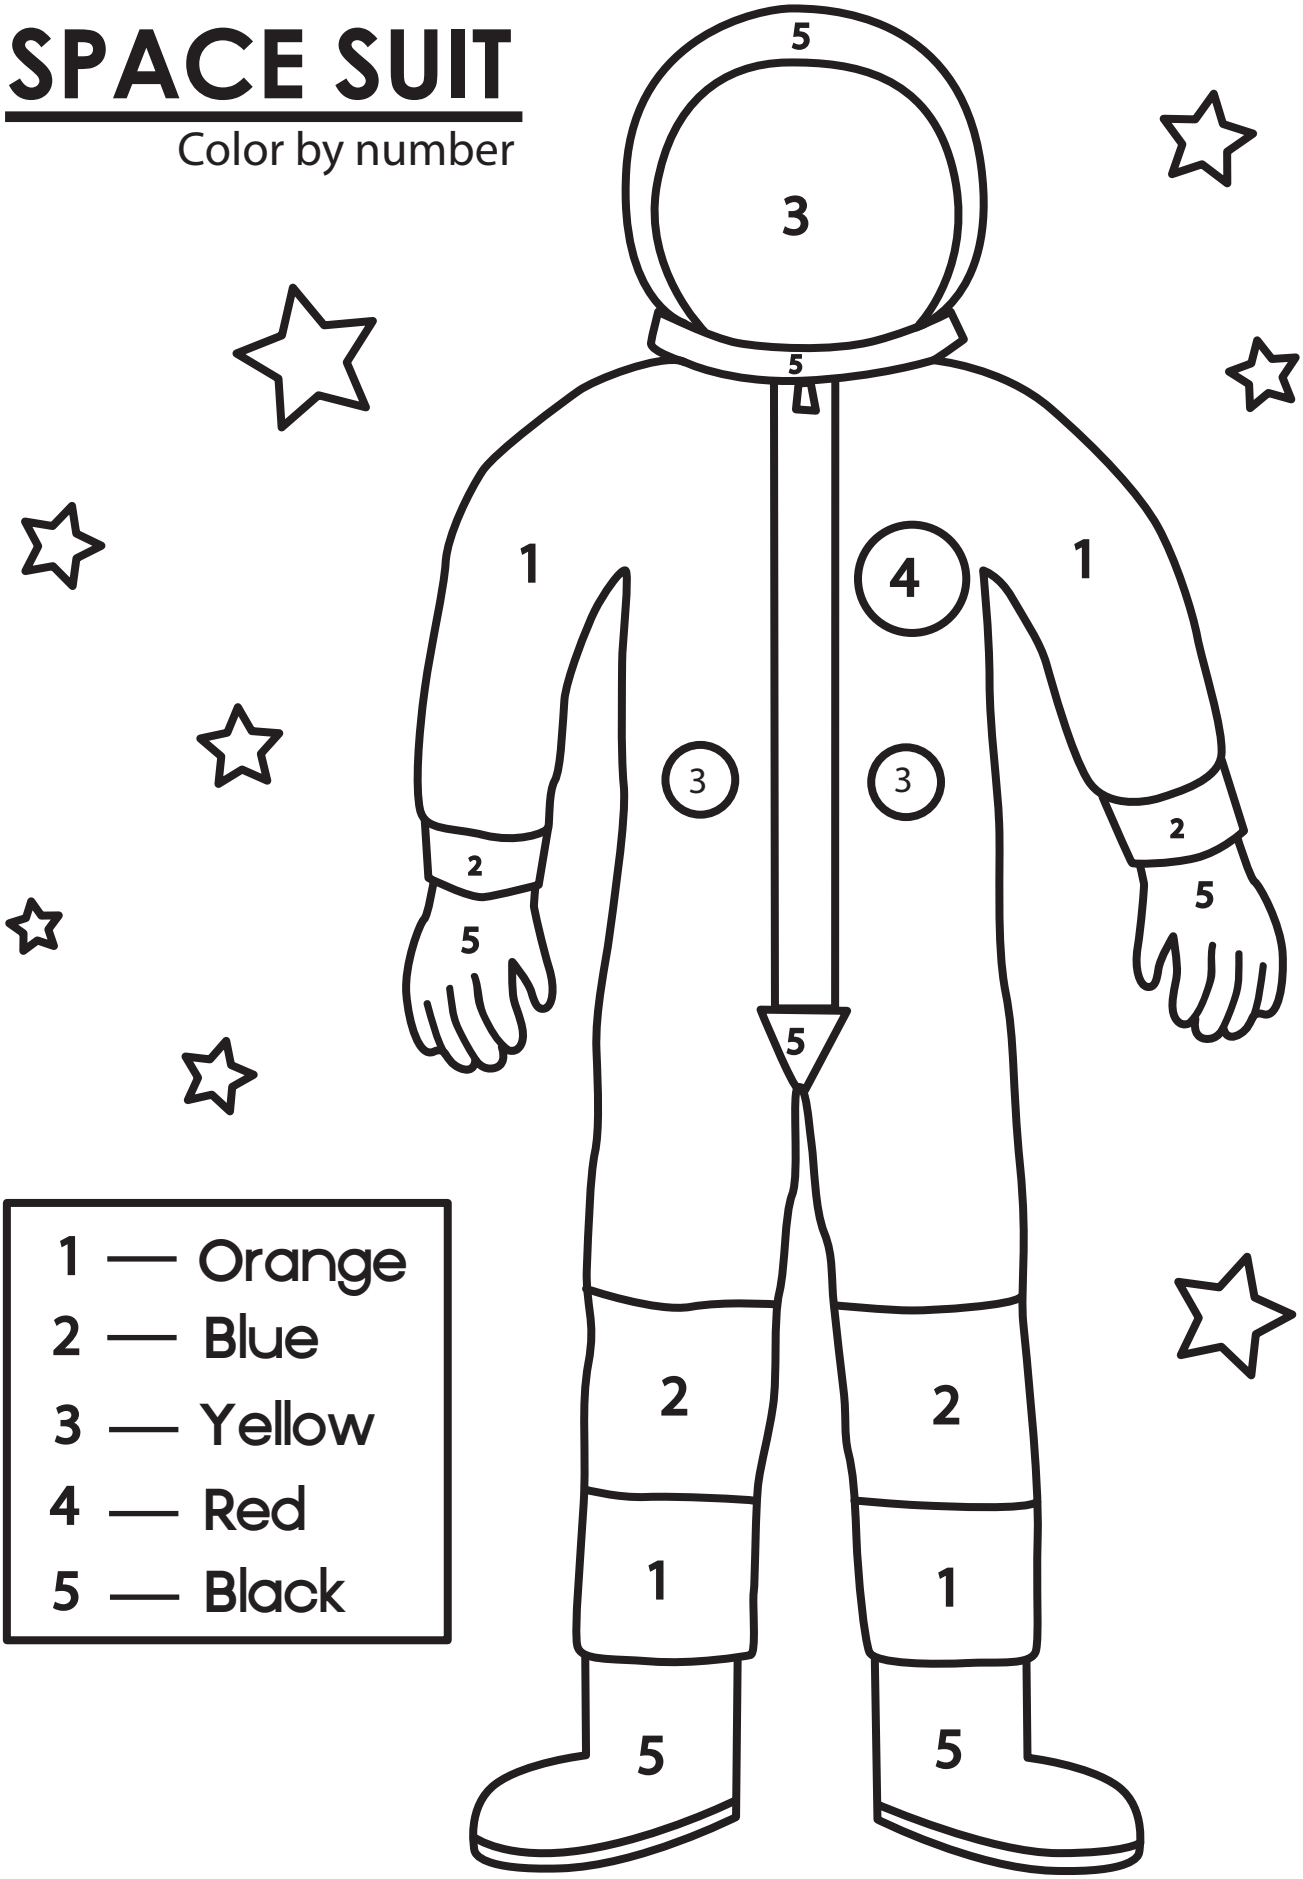

A space suit lets astronauts work and live in space while being protected from harsh elements. It gives them air to breathe, and protects the astronauts' body from the extreme heat and cold. A suit is like a spaceship built for one. It's a machine made up of lots of parts, with air conditioning, heating, air to breathe and water to drink. There's even a built-in toilet!

THE BASKING SHARK

The basking shark is the second largest living fish: they can reach over 30 feet long! Basking sharks are generally not aggressive, and they feed by spreading their mouths wide open to scoop up tiny zooplankton and invertebrates.

THE HAMMERHEAD SHARK

There are many different types of hammerhead sharks, but all of them feature the elongated and flattened head. It is believed that the distinctive shape of the head improves vision, and increases the sharks ability to detect prey.
