

What is the Significance of Your Study?

Introduction: Stating the significance of the study provides details to the reader on **how** the study will contribute such as **what** the study will contribute and **who** will benefit from it. It also includes an explanation of **the work's importance** as well as its **potential benefits**. It is sometimes called rationale. (thesisnotes.com, 2016)

It is not enough to just mention the problem to be investigated, but it is equally imperative to state the significance to study as it proves the research's 'worthiness'.

An Sample Statement of the 'Significance of the Study'

Significance of the Study

The findings of this study will redound to the benefit of society considering that mathematics plays an important role in science and technologies today. The greater demand for graduates with mathematics background justifies the need for more effective, life-changing teaching approaches. Thus, schools that apply the recommended approach derived from the results of this study will be able to train students better. Administrators will be guided on what should be emphasized by teachers in the school curriculum to improve students' performance in mathematics. For the researcher (or researchers if it is a group study), the study will help them uncover critical areas in the educational process that many researchers were not able to explore. Thus, a new theory on learning mathematics may be arrived at.
