

Writing a Research Question, Problem Statement and Hypothesis

By making the problem clear acts as a guidance in maintaining reliability and validity.

Introduction: Introduction: A research always start out with a problem. The problem being investigated needs to be clear and concise. This may take the form of a statement or question. Below are some videos explaining three forms of making the problem clear at the beginning of the research. These are:

- Research question
- Problem Statement
- Hypothesis

Research Question
