

Pros and Cons of Using Plastics

Advantages of using plastics rather than metals:

1. Plastics are cheaper
2. Plastics are readily available
3. Plastics are easily shaped
4. Plastics can be rolled into thin sheets
5. Plastics are non-corrosive

Disadvantages of using plastics rather than metals:

1. Plastics are easily combustible
2. Plastics give off toxic fumes contributing to air pollution
3. Plastics are non-biodegradable
