Prevention of Air Pollution

Student Activity

Click on the link to look at the video on Air Pollution.

https://www.youtube.com/watch?v=fephtrPt6wk

- You may replay the video as many times as you like to help you to understand pollution.
- At the end of the video try to answer the questions below.
- You may **say** or **write** your answers.

1. Name some natural sources that a tiny percentage of air pollution comes from.
2. What is responsible for most of the world's air pollution?
3. What are some of the activities that cause air pollution?
4. Give some examples of fossil fuels.
5. Discuss some activities that you can do to reduce air pollution.

Answers

1. Volcano eruption, dust storms, allergens, wildfires
2. Human activities
3. smoking cigarettes, burning fossil fuel, driving cars, releasing toxic smoke from factories
4. Fuel formed by decomposed plants and organisms
5. Walk, use a bicycle, switch off lights, television and electrical devices when not in use, spread awareness among our friends and family
