How to make a Print

1. What you need

You will need the following:
1.Glass or mirror
2.Paints
3.Brushes
4.Smooth shiny paper
5.Construction paper for frames

2. Adding acrylic paint or Inking the Design

Add some paint at different areas on the surface of the glass or mirror to make the desired design. With a brush, disperse paint uniformly but not too thinly. This should be done quickly so that the paint does not dry right away.

3. Covering with paper or Registering

Carefully lay prepared paper on the glass with paint.

4. Pressing

Firmly press paper with your palm and give the paper slight rotation to allow paints to smear/ smudge. This will transfer the paint unto the paper and create a unique design.

5. Uncovering to reveal your Design or Print

Carefully separate the printed paper from the glass surface and allow print to dry for a few minutes.

6. Framing

Coloured construction paper can be used to create a frame for the print.
